Oral contraceptives have helped women become autonomous in the last 40 years; we no longer have to make a choice between enjoying our sexuality and becoming burdened with an unintended pregnancy.

It's a sign that not all of Amazon's big investments are paying off.

The 10 and 20 mg doses produced increases in standing 1-minute systolic pressure of about 30 mmHg at 1 hour; the increase was sustained in part for 2 hours after 10 mg and 4 hours after 20 mg.
